## Hygienic Respiratory Protective Face Masks

**Use of Cloth Face Coverings to Help Slow the Spread of COVID-19.** The CDC recommends that people wear cloth face coverings in public settings when around people outside of their household, especially when other social distancing measures are difficult to maintain. Cloth face coverings may help prevent people who have COVID-19 from spreading the virus to others. Wearing a cloth face covering will help protect yourself and help protect people around you, including those at higher risk of severe illness from COVID-19 and workers who frequently come into close contact with other people (e.g., in offices, stores, and restaurants). Cloth face coverings are most likely to reduce the spread of COVID-19 when they are widely used by people in public settings and business establishments. The spread of COVID-19 can be reduced when cloth face coverings are used along with other preventive measures, including social distancing, frequent handwashing, and cleaning and disinfecting frequently touched surfaces.

With the Coronavirus/COVID-19 outbreak, the time has never been more urgent than now to protect yourself, as well as clients and crew, from the possible transmission. If you have any questions regarding any of our protective masks, please give us a call or contact us through our web form.
